

Jobs

We are one of the leading EMC laboratories in Germany and are looking for our locations Ludwigsburg / Stuttgart and Egling / Munich

MOOSER

Electrical engineers (m/f/d) and engineers (m/f/d):

Test engineer or technician (m/f/d)
with specialization in electromagnetic compatibility (EMC)

Development engineer (m/f/d)
in electrical engineering, in HF or automotive electronics

Your tasks are:

- Up-to-date EMC measurement technology and processing for our customers from the automotive sector, industry, military and aerospace technology
- Supporting and consulting activities for our customers and implementation of EMC qualifications
- Supporting and qualification of complex components and systems mainly used in the automotive sector. Beside the well-known low voltage devices, the focus shifts to modern modules in the area of electro mobility
- Active participation in quality management
- Coordination and evaluation of measurements and testing
- Preparation of complex test documentation in English and German language
- Automation of testing facilities
- Supporting and consulting activities for our customers and their suppliers
- Development and optimization of HF and digital electronics (depending on the location)
- EMC optimizations of customer products (depending on the location)
- EMC simulation (depending on the location)
- Type approval testing for the Kraftfahrt-Bundesamt (as technical service)

Requirements / Qualifications:

- Electrical Technicians (m/f) with professional experience
- Dipl.-Ing. electrical engineering or MSc or BSc with focus on communication technology, HF technology or automotive electronics
- Experienced in modern hardware design and state-of-the art test technology
- Ability to work in a team
- High commitment and goal-oriented work

We offer to you:

- A highly interesting and diversified job
- State-of-the-art technology
- A steady occupation
- Salaries according to performance
- You will be integrated in a young and performance-oriented team.
